

ABOUT US

Baranowski Hotel is situated in Slubice, about 2 kilometres away from Slubice-Frankfurt (Oder) border crossing, and 2 kilometres from Swiecko border crossing. The hotel's chief asset is its location by the A road to the West of Europe. The hotel, set up by Tadeusz Baranowski, has existed since September 1, 2000.

The hotel provides high-quality services. It also meets the requirements of the rooms' standard and equipment. For that reason, we were granted the status of a three-star hotel (***) in the year 2001 by the Provincial Governor of the Lubusz District (województwo lubuskie), the decision number 43/2001.

The hotel complex consists of 4 buildings with 80 rooms altogether, a conference room, a restaurant, a sauna, and a salt cavern. The perfect location combined with quality service and top equipment make our hotel an excellent place for business meetings and social gatherings.

RESTAURANT

Welcome to our restaurant. The chef recommends traditional Polish specialities as well as delicacies from all over the world.

Friendly welcoming service and period interior are chief qualities of our restaurant. Our cozy bar is a perfect place for relaxation over a cup of coffee. We also offer a good selection of drinks, cocktails and alcohols.

Spacious interiors that can hold up to 120 people allow us to organize banquets, receptions and other celebrations. Our offer enjoys popularity thanks to the hotel's chief asset: the complex's location outside of the town centre.

We offer catering services.

The restaurant is open everyday from 7 am to 11 pm.

LEISURE

SAUNA

There is a Finnish-style sauna and a steam sauna at the hotel.

Using sauna has great health benefits:

- it detoxicates the body by inducing perspiring to provide a comprehensive cleansing of the skin and sweat glands (opening pores and flushing impurities from the body) and getting rid of waste product;
- it stimulates bodily fluids circulation;
- skin temperature rises to 40°C (104°F) – the increased blood flow brings important nutrients to subcutaneous and surface tissue, promoting cellular activity and growth;
- during a sauna session, the heart rate increases by 50-75% (it raises at the beginning of the session, and drops at the end). Also blood flow to the skin increases to as high as 50-70% of cardiac output;
- the breath rate increases, which leads to the lungs ventilation

All of these changes and processes are essential for a healthy person, because they provide a training for the circulation system (blood vessels become more flexible and there is increased circulation to the extremities) and the respiratory system. They also stimulate the functioning of the endocrine system in which hormonal changes are provoked. What is crucial is stimulation of the pituitary gland which regulates homeostasis.

To sum up, sauna has got a favorable influence on the nervous system and mental state. A period of stimulation is followed by relaxation, sometimes resulting in drowsiness.

Undoubtedly, steam sauna is particularly worth taking into consideration as it guarantees optimum skin moisture at a moderate temperature. Hence, after a long journey, the hotel guests have a chance not only to rest in our comfortable rooms, but also to use

all the attractions that guarantee relaxation and getting rid of stress and tension, and raise our guests' spirits, simultaneously improving their physical condition.

SALT CAVERN

The salt cavern providing iodine inhalations is definitely a great attraction for our guests as it produces a healthy maritime microclimate. It is based on utilizing both the natural properties of salts and equipment which, when combined, create a characteristic microclimate of a seacoast and a salt mine. The microclimate retains required humidity, temperature, and it contains all necessary chemical elements, e.g.: iodine, calcium, magnesium, sodium, chlorine, potassium, iron, copper, selenium, chromium, bromine. Medicine discovered the benefits of the brine use and staying at health resorts a long time ago. Since the cavern supports treatment of many illnesses, it mainly has medical recommendations. It helps treat the following diseases:

- infections and diseases of the upper- and lower respiratory tract: sinusitis, rhinitis, laryngitis, pharyngitis, bronchitis, bronchial asthma;
- dermatological diseases: psoriasis, nettle rash, dermatitis, acne;
- diseases of the cardiovascular system: hypertension, coronary disease;
- diseases of the digestive system: gastrointestinal ulcers, duodenal ulceration, metabolism disorders
- rheumatic diseases
- problems with the nervous system: high nervous tension, neurosis, states of irritation, exhaustion;

These are the reasons why the salt cavern is so popular not only among tourists visiting our hotel, but also tourists staying across the border, and inhabitants of S³ubice who wish to improve their physical condition. Thus, not only does this attraction guarantee relaxation and a chance to unwind, but it also improves the physical state and health.

Recommended treatment – on alternate days for 2 weeks, with a 2-week break after.
